You typically need an <u>Ethernet crossover cable</u> connected to you laptop/computer and the LAN connection of the MSG. The first thing that you need to do is change the IP of your laptop/computer that you will connect with the MSG column. You do this by right clicking the My Network Places icon as shown below.

You then have to right click on the appropriate network connect and choose properties.

You then choose TCP/IP - Properties

Change it to 192.168.11.121 like below and hit OK

When it is all done receiving it will ask you to save the file. Choose a name and place that you will remember and hit SAVE.

Now you are ready to send in the new file. Choose Send LDP

Choose the file that was emailed to you and hit open.
