Instructions to send program into MSM column

If connecting directly between your PC and the column you must use a **CROSSOVER ETHERNET CABLE!**

If you haven't changed the network setting of the MSM column the default IP address is 192.168.11.128

You must change your IP address on your PC to be on the subnet. Example: 192.168.11.XXX with XXX being a number between 1 and 127. Do not make your PC address 192.168.11.128 as this will conflict with IP address of the MSM column.

Open the Stotz – MSM Tools – LDP Send-Receive program as shown below

Your screen will look like below. Click the Send LDP button

Choose the file that was emailed to you wherever you stored it as in the example below.

Your screen will then look like below:

Recycle Bin Stype Stype Stype Controls 2010 Outlook		
Adobe SolidWorks MLS Simple SC-M		Power on AME pc
Adobe SPC-PD		others (192.168.42
Cratter 00091 MLS/RS232	Send ULTRA-DEX-Backupidg Open Contract P Hostname Device 2D Order 1D Customer N Application	OpenVPN Connect
DWG MSG-W		AME-PC
Four Reader chrs-T Drive Natastra350	Remote project name: Send Close
